

MUHAMAD IQBAL BIN ABD HALIM

Tel: 018-290 3540
Email: muhamadiqbaljob@gmail.com
LinkedIn: www.linkedin.com/in/muhamadiqbalhalim/

Results-driven Computer Science graduate with experience in software development, data integration, and data analysis. Skilled in Python, Java, C++, and SQL, with hands-on experience in web and mobile application development. Strong problem-solving abilities and a focus on building efficient, scalable solutions.

KEY SKILLS

- Office Suite: Word, Excel & PP
 - Tableau, Power BI and PowerApps
 - Data Analysis: Python, Pandas, NumPy, Matplotlib, Seaborn, SQL, MongoDB
- Programming: Java, C++, PHP, HTML/CSS, JavaScript
 - Video directing and editing
 - Graphic design
 - ETL pipeline and documentation
- Frontend/Backend handling
 - Debugging & Troubleshooting
 - Software Testing
 - Technological Literacy
 - App development

LANGUAGES: Malay (Native), English (Advance), Mandarin (Basic)

EDUCATION

Oct 2022 - Dec 2025	Bachelor of Computer Science (Honours), Universiti Teknologi Mara (Kampus Jasin) <u>CGPA:</u> 3.40 <u>Award:</u> Dean's List Award
Aug 2020 - May 2022	Matriculation Certificate, Selangor Matriculation College (Banting) <u>CGPA:</u> 3.63 <u>Award:</u> Dean's List Award

RELEVANT EXPERIENCE

Sep 2025 - Dec 2025	Software Engineer Intern <u>Blue Ocean IT Sdn. Bhd., Petaling Jaya</u> - Engineered and optimized ETL pipelines using Python and SQL, improving data processing efficiency. - Developed and debugged Python scripts and SQL queries to ensure data consistency and system reliability. - Collaborated within an agile team to design, test, and deploy enterprise-level applications. - Analyzed system architecture and produced technical documentation to improve workflow efficiency.
Aug 2024 - Sep 2024	Retail Assistant (Frozen Department) <u>Carey's Grocer Amverton, Shah Alam</u> - Managed inventory and ensured product quality for frozen goods. - Assisted in cashier operations and customer service. - Supported daily store operations including restocking and inventory handling.

PROJECTS

Feb 2025 - July 2025	Real-Time Vehicle Registration Plate Detection Using YOLOv8 Developed a mobile application for real-time license plate detection using YOLOv8. Integrated Firebase for real-time data storage and reporting. Improved detection performance through image preprocessing and model optimization.
July 2024	Task Management System Developed a web-based task management system using Java, HTML, CSS, and SQL. Enabled users to track and organize daily tasks efficiently. Designed backend database for data storage and retrieval.
Mar 2025	Predictive Model for Student Attendance Built a machine learning model using Python, Pandas, and scikit-learn. Achieved over 80% prediction accuracy for event attendance forecasting. Enabled data-driven decision-making for event planning.

LEADERSHIPS & INITIATIVES

Nov 2025	Participant - Top Coders Malaysia Developed a data analysis prototype using Python. Improved teamwork and problem-solving under time constraints.
Oct 2025 - Feb 2024	Active Member - Peers Club UiTM Participated in community service and campus initiatives. Developed teamwork and event coordination skills
Mar 2023 - Aug 2023	Executive - Student Representative Committee (Entrepreneurship) Organized entrepreneurship events. Managed planning, coordination, and execution of student programs
